Newman® Quartz Information

Meet the newest and lowest-cost member of the Detex watchclock family. Our new battery-operated Newman Quartz watchclock delivers all the dependability you'd expect from a Newman, but with a reliable quartz movement. The Newman Quartz watchclock is lightweight and is built to withstand rugged use with a die-cast aluminum housing and a tough nylon case. Best of all, it never needs winding.

The Newman was the first portable watchclock of American design. Built to a high standard of quality and ruggedly constructed, it is simple in operation and provides maximum service with minimum wear.

Features

- The only dial watchclocks that provide an embossed, 24 hour record made directly by raised numerals on the recording keys without ribbons, carbons or inking devices.
- Advancement of the dial is synchronized with the clock mechanism, so that consecutive station registrations appears unbroken bands of numbers; missed stations appear as conspicuous gaps.
- Will accomodate up to 40 stations.
- Tampering detector indicates if clock has been opened or closed.
- Dials and tapes are virtually impossible to counterfeit.
