ProxiPen

ProxiPen Information

Proximity-based Electronic Guard Tour Verification

Detex introduces the latest innovation in guard tour verification technology: the new GCS ProxiPen Data Acquisition Unit and **TopGuard Patrol reporting software**. ProxiPen's data points are Radio Frequency Identification (RFID) tags, which the ProxiPen senses and reads automatically whenever they come into its reading range. You don't need to actually touch the RFID tag to get a quick, accurate reading; just get close!

This means that ProxiPen can read a tag even if it is wet, frosty, dirty, greasy, or painted over. In fact, ProxiPen's RFID tags may be concealed behind wallpaper, sheetrock, plaster, paneling, mirrors or any other nonmetallic surface; a real plus in applications where aesthetics or vandalism are considerations.

Toughness plus advanced technology – but easy to use. ProxiPen is compact, lightweight and easy to use since it has no external controls. Correct data readings are confirmed by visible and audible signals. Its electronics are sealed in a tough polycarbonate housing, making the
